Tennis Tournament Results.

The first elimination of the Men's Singles has been completed, and, as was expected, Mr. Yeats took the final. Some unexpected wins were seen before then, however, and altho the up-and-comers have a long way to go yet, and a good deal to learn about the game, the outlook is bright to say the least.

The unexpected upset was the defeat of Mag Larson by O Oppertshauer in 2 sets, 6-4 10-8.

Mortimer defaulted to Oscar, and in the other semi-final bracket, Yeats defeated W Oppertshauer in straight sets 6-0 6-1, and then defeated Oscar in straight sets.

The last round of the challenge draw has been played, the only surprise was the battle given O Oppertshauer by H Outway. Results are as follows—

L Outway defeated E Enders—default.

I Wudel def. P Comisarow 6-4

6-4

O Wudel defeated Pat Gannon 8-6

6-1

Don't Boast Now.

A visitor from the City was ambling around a certain town recently and on meeting an old resident remarked "I suppose a nice little town like this can boast of a baseball team?"

"Well," remarked the old resident, "time was when we could boast of it; but now we kinda apologize for it."

Mag Larson def. G Robertson 6-1

6-0

O Oppertshauer defeated H Outway

6-4 10-8

P Enders def. W Larson 6-2 6-0

W Oppertshauer defeated B Downs default

THE NEWS OF STONY PLAIN AND DISTRICT.

Mr and Mrs G Botsford and M Hayes, of Edmonton, and Messrs Paris and Mortimer of Onoway were the playing guests at the social given last week by the Stony Plain Lawn Tennis club.

Mr and Mrs Larson had as visitors this week at their home here Mr and Mrs Matson and family, of Winnipeg; Mr Matson is a brother to Mrs Larson. Another visitor at the Larson home was Mr Bergstrom of Melville, Sask., who was on his way back from a motor trip to the Coast.

Mr Glen Carmichael, who had been teaching school at Moose Portage, paid a short visit at his home here, returning on Monday to resume his duties.

Mr and Mrs S M Wainberg Mr Alex Wainberg and Mr and Mrs J Newhouse of Edmonton, spent the week-end at the Comisarow home.

Residents of Railroad ave., who have gone to considerable trouble and expense in building up the beautiful caragana hedge on the avenue's north side, are worried lest the spruce worm, the green army worm, the June bug, aphids, or whatever it is that's eating the caragana hedges in the City, may attack theirs.

Mike Turlock, a railroader and a former resident, is in an Edmonton hospital receiving treatment for cuts about his head received in an auto accident on Jasper Highway, near Duffield Corner.

Mr H Schlitt has retired from farming in Rosenthal district, hauled a small-sized building onto a 2d St. east lot in which he will take up his residence.

The bandmaster and members of the Town Band had received an invitation to be present, next Sunday, at the German Canadian reunion to be held in Edmonton.

Miss Mabelle Clarke, who is at present with a motor party touring the Coastal cities, is expected back in Stony early next week.

A very pretty wedding service took place at the local United Church on Wednesday July 25th, when Miss Elsie Irene Witmer, daughter of Mr and Mrs Simon Witmer of Glory Hills became the bride of Mr Johannes Miller, son of Mr and Mrs P Miller of Melvill.

Mr and Mrs Philip Singer were Sunday visitors with Mr and Mrs Kelly.

The Metzler motor party returned on Saturday from the trip to Banff.

The pastor and congregation of St. Matthew Church (Missouri Synod) held a very successful Missionfest on Sunday last; a record crowd being in attendance.

BUTTER AND EGGS WANTED at The Royal Cafe.

The Leader for Over Forty Years

"SALADA"
TEA

"Fresh from the Gardens"

Conscience And The "Talkies"

Hollywood and the motion picture industry have been occupying even more than their accustomed share of the newspaper spotlight during recent months—and to some effect. There are indications the results of inquiry and publicity will have a salutary (if not salutary) influence upon the product distributed for the entertainment and edification of the theatre-going public.

The tremendous potency of the "Talkies" as agents for popular uplift, perhaps transcending that of the pulpit or the press, has found all too belated recognition in official quarters. Steps should have been taken, years ago, to ensure the influence exerted should be for good, for the elevation, not the debasement, of public taste. Institution of a more direct and rigid censorship at the source of supply now, appears very much like closing the stable door after the horse has been stolen. Much harm has been done already.

Death of Dillinger, who had the unenviable notoriety of being classed as "U.S. Public Enemy No. 1," just as he left a Chicago theatre where a "crime" picture had been shown, came as a somewhat lurid commentary upon the feature of the business which had been engaging public attention. There had been a surfeit of "crime" films—pictures which, despite the anodyne of a little sickly sentiment, had tended to metamorphose the "public enemy" into the "public hero," to throw a romantic glamor around the gangster and his "Moll," to sugarcoat the sordid and the subversive. The morbid and degrading curiosity of the mob which battled for sanguinary souvenirs of the dead Dillinger (the blood-stained garments and be-spattered paving stones) can be construed only as a species of hero-worship—a hero worship gone hay-wire, become depraved and distorted.

The "crime" picture had been accompanied by an apparently endless string of "sex" films. It was only too easy, and to be expected, that the Dillinger climax to the first should be paralleled by an equally sensational climax in the case of the second. The "sex" series ended in a notorious "morals scandal" trial which occupied the attention of a Hollywood court at the very time police were ending the hectic career of the gangster.

There is no gainsaying that presentation of crime and sex in the average film has been anything but a healthy influence; nor can it be gainsaid that the sole criterion of motion picture production in the past has been box-office receipts. Such a criterion inevitably led to over-emphasis of sensationalism, the featuring of the thrill; and the anodyne of a little moral sentiment has never been applied in sufficient dosage to neutralize the possible evil effects upon impressionable minds of scenes and sounds of doubtful moral quality.

Action finally has been taken to impose a new and stricter censorship upon the film industry, which proposes to expurgate the more harmful features of Hollywood box-office attractions placed in circulation. The censorship will apply not only to the pictures themselves, but also to the stories procured for film purposes.

Concerning the average story submitted and accepted, there apparently is a reason why they should be trite and commonplace both in theme and presentation. Apparently, there is a premium upon the banal. James R. Greison, noted playwright and actor, has been giving some rather cynical advice upon "How To Write A Talkie" to readers of the Leeds (Eng.) Mercury. He advises aspiring scenario-writers never to try for style, and never to write like a Galsworthy, a Hardy or a Madox Ford; bare-bones and nothing more is wanted. He concludes in this vein:

"Never mind feeling ashamed of the story—send it off at once before your conscience gets going. And as soon as you've sent it off start on another—or the same one made slightly different. When your first story comes back from the first film company, send them the second and send the first to another firm. When you have about a dozen stories, keep them circulating. Don't hesitate about sending the same people a story which they have once rejected. They have probably changed their reader in the meantime."

Apparently the motto for those who seek this way to wealth is: "Abandon conscience those who wish success".

Building Activity At Coast

Considerable Construction Work Going On In British Columbia

Considerable activity is noted just now in British Columbia construction circles. Road-surfacing, theatre building and home-building are noted in contracts recently signed, while largest of the enterprises is a new mill of the Great Central Sawmills, Great Central lake, which is being built at Port Alberni. Cost of the plant is estimated at about \$600,000, and an average of 500 men will be employed.

Some animals of the same species have more ribs than others.

Scientists Are Puzzled

Striped Tree In California Is Producing Pink Lemons

Pink lemons are being grown in California. They are growing on one tree in a grove which has become a Mecca of astounded scientists who gaze at this phenomenon with awe and periodically and gravely pinch themselves. The skin and fruit of the lemons are a vivid pink, but this is not the only strange feature about the tree. The trunk and branches are striped, while some of the branches are white and others green. The white boughs are quite barren.

A German baron owns 20,000 fleas.

Looseness Of The Bowels
During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly. Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 88 years.

Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it.

Put up only by The T. Millburn Co., Ltd., Toronto, Ont.

Giant Mersey Tunnel

Huge Engineering Feat Is Formally Opened By The King

The world's longest underwater roadway, the giant new Mersey tunnel between Liverpool and Birkenhead, was recently formally opened by the king.

His Majesty pressed a golden switch which rolled back huge green and gold curtains, and formally declared open what has been called the greatest engineering feat of modern times. The tunnel has four lanes for vehicles and broad sidewalks for pedestrians.

"Who can reflect without awe on that will and power of man which in our times has created the noble bridges of the Thames, the Forth and the Sydney harbor, and has driven also tunnels such as this in which many streams of wheeled traffic may run in light and safety below the depth and turbulence of tidal waters bearing the ships of the world?"

The tunnel is named the Queensway in honor of the queen.

It was conservatively estimated that more than a million persons were present.

The tunnel has been under construction for nine years. Outside of the actual boring the chief difficulty encountered was that of ventilation. The total cost is estimated at \$35,000,000. The tunnel contains a three-mile roadway of special cast-iron sections.

Chance For Canadian Girls

Australian Lace-maker Hopes Someone Will Copy His Designs

"For the instruction of Canadian girls" an Australian lace-maker, William Blacker of Jones Creek, Queensland, has sent to Canada a specimen of lace and two hand-carved serviette rings. They are in the hands of Col. Wilfrid Bovey, president of the Canadian handicrafts guild, at McGill University.

In the letter which accompanied the specimens, Mr. Blacker explained he learned to knit and to make fishing nets during a long illness in his boyhood, and later used this experience to make lace after an idea of his own. The inspiration for the wood carving, he said, was gained through watching Australian aborigines at their work.

Mr. Blacker complained that very few of the girls with whom he has come in contact in Australia have the necessary proficiency in knitting and net making, and they have not the time to learn; so he fears that his skill in lace making will be lost. Thinking that, because "of the long, cold winters" in Canada, the girls here may have no opportunity to stay home and knit, he sent samples of his craft and expressed the hope that some Canadian girls "who take an interest in artistic matters may enjoy trying to produce something that will be a novelty."

Receive Big Salaries

Motion Picture Stars Receive More Pay Than U.S. President

The United States motion picture industry, even while suffering a loss of \$19,859,393 last year, was shown to have given 110 people larger salaries in 1933 than that received by President Roosevelt.

Three others equaled Mr. Roosevelt in the salary he would have received without his government pay of \$19,859,393.

The peak yearly pay cheque for the industry, \$315,000, was paid to an unnamed actor. The second highest, a salary of \$290,250, went to an "artist" who received \$10,000 a week when he or she was working.

These figures were contained in a report of N.R.A.'s six months' study of the producing, distributing and exhibiting branches of the film industry.

With the exception of buckwheat, the grains ground in Canada during May, 1934, were lower than in May last year. The amounts in bushels, with the comparative figures for May last year in brackets, were, wheat, 5,255,207 (5,959,083); oats, 878,306 (621,581); corn, 144,344 (194,044); barley, 47,978 (49,211); buckwheat, 3,808 (2,744); and mixed grain, 726,298 (1,021,874).

In his youth, George Washington made a trip to Barbados in the West Indies.

Well Known "Mountie" Chosen

Corporal Stallworthy Recommended To Shackleton As Weather Expert

When Edward Shackleton, leader of the Oxford University expedition into the Canadian Arctic this summer, asked the Canadian government for an experienced expert on conditions in the frozen wastes of the far north, Corporal F. H. Stallworthy of the R.C.M.P., formerly a constable in Alberta and now at Ottawa, was immediately named.

Famed for his exploits in the lonely Ellesmere Island district, Corp. Stallworthy will accompany the expedition to that territory where it is panned Shackleton will establish the base.

Five years in various parts of the Arctic and his splendid work on the Bache peninsula where, at one time he was marooned for a whole year, have fitted Corp. Stallworthy for this new post he will fill.

Last November, Miss Hilda Austin, daughter of the rector of St. Catherine's church, Edson, married Mr. Stallworthy and during his absence in the north she will remain in England with her husband's parents. The expedition planned the journey into the north from the European side and while in Ellesmere land will make an attempt at reaching the north pole.

Huge Producer Of Gold

Expert Soviet Output Will Be Second Largest In World

Soviet Russia now ranks as the second largest producer of gold in the world as the result of spectacular output gains in the past two years, the most recent estimates, official and otherwise, indicate.

The 4,000,000 fine ounces of gold which the Soviet Union is expected to produce this year would outstrip both Canada and the United States, long rivals for the position of runner-up to South Africa. Russian output in 1933 is officially placed at 2,460,000 fine ounces by the government, a gain over 1932 of 142 per cent. and more than twice the annual average of Czarist days.

The Soviet government claims to have spent more than 500,000,000 rubles in the last four years on the gold mining industry. Its foreign orders for gold mining machinery have grown visibly. Officials of the Bolshevik regime assert that Russia's gold deposits are well-nigh inexhaustible and that the U.S.S.R. some day will exceed even the Transvaal, richest gold source ever found.

Tree Planting Plan

Shelter Belt 100 Miles Wide From Canada To Texas To Be Planted

United States Secretary of Agriculture Henry Wallace announced that work would begin immediately on a \$75,000,000 project to plant a forest shelter belt 100 miles wide extending from the Canadian border to Texas.

President Roosevelt in an executive order, signed July 11, allocated \$15,000,000 of emergency funds to begin work.

Canada is specifically mentioned in an order issued by the German government respecting the importation of fruit into Germany. All imports from the Dominion must be shipped direct to specified ports and be subject on arrival to inspection for San Jose scale and railroad weevils.

Hunting coyotes with aeroplanes has become a popular sport in Montana.

To Save Sugar Crop

Files Brought From Brazil To British Guiana By Air Mail

Three men nearly lost their lives on a journey of 1,500 miles to bring some files from the interior of Brazil to Georgetown, British Guiana. The files, it is hoped, will save the chief product of this British colony—the sugar crop. In six special packages the files have travelled 500 miles down the River Amazon to Para by fast motor launch, and then 1,000 miles by air mail. They have been brought to fight the moth borer, a pest which at present destroys about 20 per cent. of the sugar crop by burrowing through the sweet cane. They are "Amazon files" and their existence—and partiality for moth borers—was discovered after two years of research by Dr. J. G. Myers, of the Imperial Institution of Entomology. Dr. Myers set out with a "force" of these files with a number of assistants, and has had an adventurous journey. The launch in which he brought the files down the Amazon had to be carried on a bullock wagon over twenty miles of mountainous country. Once the boat was swamped in rapids, and Dr. Myers and his two chief assistants had a narrow escape from drowning. All the scientific instruments for the expedition were lost. But the files were saved and, if conditions suit them, they should obliterate the moth borer.

University Gets Radium

Was Most Valued Possession Of Late Madame Curie

The late Mme. Marie Curie's most valued possession, a gram of radium purchased for her in 1921 with funds raised by a committee of American women, has been passed on to the University of Paris with the stipulation that her daughter, Irene Curie be permitted to use it at will. Mrs. William Brown Meloney, chairman of the Marie Curie radium fund, said she received word of this effect.

Mme. Curie's daughter is herself a distinguished physicist, having virtually grown up in her mother's laboratory and serving as her principal assistant for years prior to Mme. Curie's death on July 4.

Mrs. Meloney expressed a belief that the radium constituted the only property of value left by Mme. Curie, with the exception of a meagre bank account, a plot of land in a Paris suburb and personal effects.

Four production in Canada for the month of May this year amounted to 1,175,433 barrels, exceeding the amount for the previous month but lower than that for May last year when 1,334,101 barrels were produced.

"Many a young woman," says Dorothy Dix, "has helped her husband to the top of the ladder." Sure, and then decided to hang the picture elsewhere.

Has Plans For Utilization Of Canadian Wheat Surplus By Producing Valuable By-Products

Plans for utilizing the Canadian wheat surplus to produce valuable by-products by chemical means are being earnestly considered by a scientist at the Canadian Pulp and Paper Research Institute at McGill University.

Dr. W. Boyd Campbell, consulting physical chemist to the forest products laboratories at the institute, discussed wheat surplus in an interview. He stated that in China, by an ingenious method, scientists had succeeded in producing a valuable substance known as monosodium glutamate from wheat, and added that the surface of the possibilities of converting wheat into more costly products had only been scratched.

"If the Dominion," he said, "were to spend a small fraction of the money it has spent on providing transportation and handling facilities for the Dominion's wheat crop on research for new outlets and new uses of wheat, I believe that the wheat surplus would in time be a forgotten tragedy. I would suggest that the Dominion government include in the budget, as a start in the right direction, the sum of \$500,000 to be used in this research over a period of five years."

The monosodium glutamate being made in China, of which Chinese have sold between \$1,000,000 and \$2,000,000 worth annually, was until recently a rare chemical found only in research laboratories in America.

It is used in China and Japan much like sugar and salt and is used here. It is a condiment used by housewives, restaurants, Buddhists and other vegetarians to impart a meatlike flavor to vegetable diets. As a flavoring agent it is 15 times more powerful than cane sugar and seven times stronger than salt.

Canadian wheat, with its comparatively high content of protein, is the best wheat for manufacture of this condiment, the scientist said. China has been making it for several years and production is shortly to be undertaken on this continent.

As Buddhists regard it against their religion to eat any meat or any food prepared from an animal substance, the condiment has a wide sale in the east. Wheat worth two cents a pound was thus transformed into a substance worth from \$2 to \$3 per pound.

But this was only scratching the surface. Other uses of the surplus could be developed, Dr. Campbell said. In suggesting \$500,000 be spent on research in this direction, he added: "This amount seems small when we consider the millions spent in establishing shipping facilities at Churchill, improvement of St. Lawrence waterways, building elevator terminals, and on creation of extensive transcontinental and branch line railway facilities for facility in the movement of Canada's wheat crop."

Scoop Weighs Twelve Tons

Huge Machine Moves 500 Tons Of Earth An Hour

The largest electric excavator ever manufactured in Europe is now being erected at Corby, England, for use at the rolling mill plant being constructed for the production of steel tubes.

The excavator is to be used in the fields adjoining the works for stripping to a depth of fifty feet to seventy-five, the soil or overburden which covers the iron ore needed to feed the huge furnace of the rolling mills. The machine, which is also known as a stripping shovel, is capable of moving some 500 tons of earth an hour. With it earth can be dug, lifted, rotated, and dumped.

The unusual size of the excavator is indicated in the facts that the job is 100 feet long; the bucket which scoops out the earth weighs twelve tons, has a capacity of nine cubic yards, and is capable of holding a full-size saloon car.

Check Soil Drifting

Alberta May Pass New Regulations For Compulsory Tree Planting

How to get more trees across the face of the country in order to check the high winds, stop drifting of soil, and incidentally beautify the landscape is one of the questions that the Alberta government is now taking up.

New regulations that will compel homesteaders to retain a portion of their land under timber are being considered and may be passed shortly, it was stated by Premier Reid.

It is believed that the passage of regulations requiring homesteaders to keep from 10 to 25 acres in bush and wood-land on each quarter section of land would have a beneficial effect both in the way of controlling the soil drifting and checking the intensity of the winds.

Combination Is Better

Soybean And Corn Make Good Feed For Hens

The use of the soybean alone for ensilage is not recommended but high quality of feed has been produced by a combination of soybeans and corn, mixed in the proportion of about one part soybeans and three parts corn. The two crops can be grown together or they may be produced separately and mixed at the time of filling the silo. Harvesting will be easier and the mixture better obtained where the two crops are grown separately.

Baseball shoes cost \$16.50 a pair. They're made of kangaroo and the average player wears out two pairs of shoes during a single season.

By Ruth Rogers

404

LOVELY MODEL FOR FIGURES ABOVE NORMAL WEIGHT

It's helpfully slimming, besides being so cool and smart.

Here's a dress that will stretch your budget for you. It's so comfortably cool and smart to wear to so many places.

It's exceedingly becoming as sketched in white tub silk with nautical blue coin dots. Stripes, checks and gay floral prints could also be used very effectively.

This model entirely in plain pastels in tub silks, pique, linen, etc., is also most attractive.

Style No. 404 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 3 1/2 yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Canada Was First Country In The World To Institute A Practical System Of Egg Grading

Require Delicate Care

Oyster Raising Is No Slip-Shod Business State Experts

Tasteful oysters, a delicacy meticulously prepared by the chef, need just as delicate care in their nurturing, in the opinion of J. J. Cowie, Ottawa, secretary of the Biological Board of Canada. With Dr. A. T. Cameron, chairman of the board, he inspected the Ellerslie station in Prince Edward Island, where research work in the cultivation of oysters is proceeding.

"This station was established in the first place to discover how Malpeque Bay could be restocked with oysters since the bay was denuded of that shell-fish some years ago, and in the second place the work is intended to develop and demonstrate the best oyster growing methods which may be applied in oyster areas throughout eastern Canada," they explained.

"This advice is especially valuable at the present time in connection with the leasing of areas by the department of fisheries," Mr. Cowie said.

Dr. A. H. Needler, the expert in charge of the work, has surveyed hitherto unproductive areas to the east of Malpeque Bay, and under his advice some of these will soon be leased for oyster culture.

This oyster raising business cannot be handled in a slipshod manner. The tasty shell-fish demand a lot of care and study before they can be harvested in wholesale quantities.

Non-Profitable Producers

Hens Completing Moulting By September Should Be Sold

Hens that complete their moult and have a complete set of feathers by September 1 should be sold as non-profitable producers. The hen that has not moulted by mid-September, is still laying eggs and will continue to do so as long as she is permitted to get a full supply of egg-making feed during the shortening days of fall. Natural moult of the best layers comes after October 15 and will last for but a short time, providing the egg laying feeding schedule is maintained through the moulting period. The natural moult of the poor layers comes with the first hot days of summer in June and lasts till fall. The poor layers do not get back to laying till after the late moults because the poor layer is also a lazy hen and will not eat enough to keep her laying.

In Canada and the more northern latitudes and on the tops of mountains, the duration of sunlight during summer is much greater than on the lowlands or in places nearer the equator.

Per capita consumption of eggs in Canada is the highest in the world—approximately 350 a year. In 1933 total marketings amounted to 8,600,000,000. Why is it that Canadians favour eggs so much? One reason, undoubtedly, is that the Dominion is the only country in the world that has a system of egg grading controlled and supervised by the Dominion Department of Agriculture from producer to consumer. Under this system only good eggs are allowed to present themselves to the consumer as companions with the ham or bacon ration or in the thousand or more ways in which eggs are used in the wide range of cooking.

Eggs also constitute an important item in the economic life of the country as a whole, to say nothing of their incomparable merit in many respects from a food point of view. The Dominion's production last year, even at the lowest prevailing price for several years, totalled about \$30,000,000.

Canada was the first country in the world to institute egg grading in any form. It was introduced in 1918.

In that year the Dominion had a substantial surplus of eggs, and the British market loomed up as a possible outlet, but other countries were keen competitors. The officials of the Dominion Department of Agriculture decided in order to establish a market standard of quality that all eggs exported to other countries and those shipped from one province to another should be graded as to quality, size and cleanliness and that the grades should be plainly indicated.

The introduction of graded eggs on the British market established an enviable reputation for Canadian eggs. Wholesalers, retailers and consumers knew exactly what they were buying. The element of uncertainty as to quality was removed with grading. Such eggs soon began to command a premium over the ungraded product shipped from other countries. The grading regulations were also applied to all eggs imported into Canada. It was not long before other countries followed Canada's lead in regard to egg grading.

Soon after the grading system for export eggs and interprovincial shipments came into effect, farmers began to see that the consumer in an overseas market was prepared to pay a higher price for an assured quality product. The advantages of grading began to be obvious to both producer and consumer. The per capita consumption of eggs in the Dominion was then about 16 dozen annually. By 1923 egg grading regulations were enacted to apply to domestic consumption. The Dominion officials concluded that if such regulations as applied to export eggs were a good thing for the farmer, then he would benefit to a greater extent if the grading regulations were made completely effective from producer to consumer in the home market. The wisdom of this was soon made evident for the per capita consumption in 1924 rose to 25.4 dozen. By 1929 it had risen to 30.05 dozen. At the present time it is between 29 and 30 dozen, the highest average of any country in the world.

There are two sound reasons why the Department of Agriculture has shown so much concern and zeal about graded or quality eggs. First, that they felt that the government has a responsibility in seeing the public obtains pure or good food. It is a sound business in public health which embraces several factors. Second, by insisting that eggs are marketed according to quality, the farmer gets the benefit of greater returns and the poultry industry is thus improved.

Quite naturally, the grading of any product does not meet with immediate approval on the part of all producers. The farmer having his eggs graded for the first time may, in fact, feel something approaching resentment. But he soon realizes that grading is of great advantage.

There are 25,000,000 laying hens on the farms of Canada.

Early Quebec potatoes appeared on the Montreal market on June 28.

NIGERIAN CHIEFS VISIT ENGLAND FOR FIRST TIME

A happy snapshot of the Sultan of Sokoto and his Prime Minister, the Waziri of Sokoto, as they enjoy the sea breeze en route to London from Lagos to visit England. Two other chieftains, the Emir of Gwandu and the Emir of Kano, with their cabinet ministers and suites, reached England at the same time to be guests of the British Government.

Must Run Its Course

Dry Hot Weather Moves In Cycles State Experts

North American farmers, tormented by drought, have plenty of company in their misery.

Southern Russia's crops have been curtailed, leading to anxieties and denials in the press of other countries that famine threatens the Soviets.

Central Europe faces seriously reduced yields of feed grains and wheat and rice harvests. England has suffered in the hottest weather in 41 years. Manchuria's farmlands have escaped the fate of other countries; but Spain and the lower Danubian countries have experienced hot, dry weather.

Ask the experts what the cause is and they answer that no one can explain fully. Dry and wet weather move in cycles, weather bureau men say. The present dry "spell" started about 1930. The hope is expressed that it has about run its course.

Japan announces that she is China's boss, but after 5,000 years of that sort of thing China can still say "Oh, yeah!"

OGDEN'S "Alls well that Smokes Well"

by LOU SKUCE

OGDEN'S CUT PLUG

WORLD HAPPENINGS BRIEFLY TOLD

An unusually severe heat wave in France caused the 964-foot Eiffel Tower to stretch eleven inches upward between sunrise and sunset, engineers said.

The total cost of Great Britain's extended air force program up to 1935 will be about \$100,000,000, the house of lords was informed by the secretary for air, Lord Londonderry.

France has decided to invite all the nations of the world to take part in a great international exhibition in Paris in 1937. Its estimated cost is \$20,000,000.

The British Columbia canned salmon pack during the year ending June 30, 1934, totalled 1,003,929 cases, the Vancouver Merchants' Exchange reported. In the preceding year the pack totalled 830,256 cases.

Hundreds of acres of sugar beets that failed to germinate because of the drought, have been plowed under by farmers in the Chatham district, according to W. H. Riddle, of the Ontario department of agriculture.

Premier T. D. Pattullo of British Columbia announced that a mountain in Mount Robson Park in British Columbia was named "Mount George Graham" in honor of Rt. Hon. George P. Graham.

Establishment of a free wheat market in the Soviet Union has been announced, and will take effect after delivery of the present harvest. The decision was made in June by the Communist party congress.

Hon. Irene Paribay, U.F.A. member for Alix and minister without portfolio in the provincial cabinet, announced at a U.F.A. constituency convention that she would not stand for nomination again.

Italy has accepted the British government's invitation to engage in conversations prior to the 1935 naval conference, and the Italian delegation will be in London at the end of the summer or the beginning of the fall.

Ramatch Chawla, the first Indian to make a flight from India to England has started on the first stage of his planned flight around the world. He is going first through Baghdad, Aleppo and Istanbul, travelling eastwards.

Canada's total exports of paper and manufactures of paper during June were \$7,277,892. This was lower than in May when the total was \$8,074,867, but considerably greater than June of last year when it was \$5,968,610.

Unearth Sea Serpent

Ancient Specimen Is Discovered By Geologists In Alabama

What may be the "daddy" of sea serpents, a mosasaurus, has been unearthed in exploration of the Alabama geological department, Dr. Walter L. B. Jones, state geologist, disclosed recently.

"We have already taken out 10 feet of a 35-foot mosasaurus near West Green, in Greens county, that probably is 70,000,800 years old," Dr. Jones said.

"And in the same county near Eutaw, we have unearthed a two-ton turtle, possibly as old. Both were encased in chalk of the cretaceous age."

The Canadian milling industry provides a market for about 15 million bushels of Canadian grown barley in the manufacture of food products and feeds.

Owes Freedom To King

Man Who Hurled Bottle At Royal Car Discharged

A man who hurled a bottle at the king and queen was discharged at police court hearing and, it was believed, had the king to thank for it. The object was thrown as Their Majesties were motorizing to Edinburgh from Harthill. It struck the pavement a few yards behind the royal car.

His Majesty expressed a wish the man be freed, it was understood.

By Ruth Rogers

THE SAILOR "GAL" DRESS A FAVOURITE WITH GROWING DAUGHTER—IT'S SO SMART—PRACTICAL

Here's an attractive little model. Little daughter will be so proud to wear it. Don't you think it really lovely? And it's so easily fashioned for a very small outlay. You'll be surprised.

It can be white linen, peasant cotton, pique, lawn, etc. Make the sailor collar, tie and belt of navy blue. A blue leather belt can be worn, if you prefer it.

The tailored sleeves with plaits are especially smart and cool. Similar plaits in the skirt allow plenty of freedom for action.

Another nice idea is to carry it out in nautical blue and white dotted pique with white pique trim.

No. 435 is designed for sizes 8, 10, 12 and 14 years. Size 8 requires 2 1/4 yards of 39-inch material with 1 yard of 39-inch contrasting and 3 1/4 yards of braid.

Price of pattern—20 cents in stamps or coin (cash is preferred). Wrap coin carefully.

Little Journeys In Science

RAYON
(By Gordon H. Guest, M.A.)

Rayon, or artificial silk, which has become in recent years a widely used product, resembles good paper in that it consists of pure cellulose. Four different processes have been perfected for its manufacture, but of these the viscose process is used for over 80 per cent of the world's rayon production.

High grade bleached wood pulp (usually taken from spruce trees), is the starting point for the production of artificial silk. Canada supplies almost 40 per cent of the world's requirement of wood for this purpose. This material, which consists largely of cellulose, is treated for two hours with a weak solution of caustic soda, which results in the formation of alkali cellulose. Surplus moisture is squeezed out of this alkali cellulose, and the material is then torn to shreds, which are left for 24 hours in a closed vessel.

A liquid known by chemists as carbon disulphide is now added, producing a solution called viscose. This solution is allowed to "ripen" for a day or two, after which it is ready for spinning. This is accomplished by forcing the viscose through fine holes, into a preparation of dilute sulphuric acid. The acid causes the fine jets of liquid to change into threads, which are spun into the material we know as rayon.

This artificial silk is altogether different from the natural product. It lacks the tensile strength of pure silk, but it has a fine appearance, and this combined with its cheapness, has led to it being used extensively either alone or as a mixture with wool or cotton.

Noted Talking Bird Dead

Provided Amusement For Many Visitors To St. Louis Zoo

Jocko, famous talking Minna, one of the various Oriental starling-like birds, at the St. Louis zoo, is dead from old age.

Jocko amused zoo visitors for six years. His repertoire included the following phrases:

"Hello guy", "Hello Jocko", "How do you like the zoo?", "Anybody home?" and "Boy, how much money you got?"

Jocko appeared in several talking newscasts. He will be replaced by another Minna, which was Jocko's understudy.

NEW CANADIAN WHITE STAR LINE

Making her first arrival at Montreal under the house flags of the new Canadian White Star Limited, the S.S. Laurentic, 16,900-ton liner docked at Montreal, Saturday, July 14, from Glasgow, Belfast and Liverpool. Her master is Captain R. Sewell Quinn, and she sailed out again from Montreal on her first departure under the new regime on July 20.

SUNDAY SCHOOL LESSON AUGUST 5

ELISHA HELPS THE NEEDY

Golden Text: "Inasmuch as ye did it unto one of these my brethren, even these least, ye did it unto me." Matthew 25:40.

Lesson: II, Kings 4:1-44.
Devotional Reading: Psalm 41:1-4.

Explanations And Comments

A Widow Helped, verses 1-7. No one can read the miracles recorded in this chapter as wrought by Elisha without remarking their similarity to some of those recorded of Elijah. Both multiplied the substance of a needy widow, both restored a dead child to life. The multiplying of the loaves and grain brings to our mind, of course, the miracle wrought by Jesus in feeding the multitude.

In our first story there is a widow in sore distress. The law allowed a creditor to take children as bondsmen for a debt—see Leviticus 25:39-41—and this woman's creditor was about to take away her two children when she appealed to Elisha for help. The method which Elisha is said to have employed to relieve her distress differs from that of most miracles of the Bible. What had she in the house? he inquired. Oil, a pot of oil. Borrow all the empty vessels you can from your neighbors, fill them from the pot of oil which you possess, then sell the oil, pay your debts, and live upon the remainder of the sale price, was his counsel. Her needs were supplied by a divine mercy of which the oil that flowed as long as she had any empty vessel to receive it is a type.

Famine Sufferers Helped, verses 38-44. There was a great famine in the land and the prophets were in dire need. Elisha made noxious potage safe for them to eat, verses 38-41, and then he made a little food go a great way. With twenty barley loaves and a sack full of ears of grain, which had been brought to him as a present, he fed a hundred people. "What, should I set this before a hundred men?" his servant exclaimed in great surprise when directed to feed them all. Said Andrew to Jesus: "There is a lad here, who hath five barley loaves and two fishes; but what are these among so many?" John 6:9.

So he set it before them, and they did eat, and left thereof, according to the word of Jehovah. "According to the word of Jehovah," the ministry of this man was wholly a ministry of the word of the Lord. By all his activity he was demonstrating to those who had the spiritual capacity to apprehend, how good and beneficent were the thoughts and instructions of God concerning his people. His deeds were expiations of his message." (G. Campbell Morgan).

Church steeples are descended from the tower of Babel, architecturally, the ancient idea being to approach heaven as nearly as possible in worship.

Agricultural Notes

Interesting Items Gleaned From Many Sources

Cattle can eat poison ivy with impunity but dogs are poisoned by it. For the past seven weeks, the amount of United States wheat in Canada has been shown as two bushels. On July 6 last year, the amount was 3,950,798 bushels.

In tests for feeding dairy cattle at Montana, it was found that the consumption of hay by growing heifers was increased by diluting molasses and sprinkling over the hay.

With the exception of corn and sugar beets which show increases, there is little change in the acreages of late-sown crops in Canada, according to the preliminary estimate.

The export of Canadian cattle to Great Britain for this year up to July 12 totalled 26,100 head as compared with 23,961 during the corresponding period of last year.

For the first 28 weeks of 1934, ending July 12, the number of hogs graded in Canada was 1,719,796, a decrease of 55,339 compared with the same period of last year.

Butter, raisins and dried currants, wheat and wheat flour are the four Australian products which do not receive the benefits of the British preferential tariff when imported into Canada.

"Handpicked" in the Fruit and Honey Act, 1934, means that, as applied to apples, pears, peaches, apricots, and cherries, they will be considered handpicked unless they show evidence of rough handling or of having been on the ground.

The exporting of approximately a million pounds of Canadian poultry during the last three or four months has had a very beneficial effect on the Canadian market and has opened up an encouraging avenue of trade for subsequent development.—Egg and Poultry Market Review.

The thorn apple, a poisonous weed belonging to the nightshade and potato family, has a variety of names—Jamestown or Jimson weed, stramonium, devil's apple, mad apple, and stinkwort. Canadian Indians speak of it as "the white man's plant." It was introduced into Canada among garden seeds.

Marketings of wheat in the prairie provinces up to June 29, 1934, as compared with the corresponding period of 1932-33, were, figures within brackets being for 1932-33: Manitoba, 27,753,972, (37,275,375) bushels; Saskatchewan, 106,419,159 (182,339,342) bushels; Alberta, 82,302,217 (140,604,307) bushels.

The methods used by our fathers are frequently held up to us as ideals. Many of these have been verified by scientific study, others have been disproven. I am sure our grandfathers tried to follow the best methods evolved by our forefathers and improve any of doubtful value. It is up to us to do the same. Science endeavours to establish the truth.—J. F. Hickey, Dominion Laboratory of Plant Pathology, Kentville, N.S.

In order to ascertain the suitability of potato flakes as cattle fodder, researches have been made in Germany where potato flakes have been manufactured for a number of years. Based on the feeding value of the product, a conclusion has been reached that they may be used with satisfactory results. Mixed with other feeding stuffs, they are said to be suitable for hogs and poultry.

Prince George is to present to the Edinburgh Zoo three lion cubs given to him by the municipality of Lydenburg, Transvaal, during his present visit to South Africa.

ITALIAN TROOPS ARE BEING HELD IN READINESS

Rome. — A statement emanating from official sources said that the Austrian government had requested intervention by European powers to guarantee Austria's integrity.

The statement, which was given to the government-controlled press, was published shortly after it was announced that Premier Mussolini had issued war time military orders to army, navy and air forces to the north of Padua.

The inspired press reported that diplomatic representatives of Italy, France, England and the Little Entente countries will hold an urgent conference at Vienna to determine what action should be taken.

The conference also will decide which of the powers should intervene in case armed assistance is determined upon.

Italian troops are prepared to march into Austria on short notice.

Leaves were cancelled, and each unit was told to keep itself in full strength with all of its mechanical war devices in order.

The order applied to 75,000 men north of Padua.

At the same time an official communique was issued stating that the first naval squadron had left Port Ancona.

The communique did not give destination of the squadron, but naval circles said that it is moving into the North Adriatic, particularly Port Trieste, to keep in touch with Austrian developments.

The Italian press regarded with particular animosity the part the German ambassador played in the granting of safe conduct to the killers of Dollfus who was to come to Italy to confer with Mussolini.

It was keeping a vigil at Riccione.

No effort was made to disguise the fact that the Austrian question is viewed in a very grave light.

"Italy is in the first line of defence for the peace of Europe," said an authoritative editorial which the newspaper Popolo Roma will publish.

It is difficult, if not impossible to deny that Germany has had grave responsibility in that which has occurred in Austria.

England Gets Heavy Rain

Traffic Held Up And Lightning Causes Wide Damage

London.—Great thunder and rain storms have swept through England, breaking the long drought and leaving everywhere a trail of havoc.

London experienced a downpour of tropical intensity and many roads were quickly under several inches of water. Traffic generally was held up, underground and surface train services were disrupted.

Hammermith bridge was struck by lightning and cables underneath it caught fire, being extinguished by a fire brigade.

A thunderbolt fell in a suburban hall and set it afire, scores of houses and shops were damaged by lightning, and many homes and buildings were flooded.

Britain's Farm Policy

Boosting Domestic Production Raising A Serious Question

Oxford, Eng.—The agricultural policy of Britain, one of boosting domestic production, in raising very serious questions for the overseas empire, declared Stanley Bruce, Australian high commissioner.

He told the Royal Empire Society's summer school here he agreed it was essential that "in these islands you have healthy agriculture, and I assure you you will have the complete co-operation of the Dominions."

He pictured Britain as the centre of a great group of agricultural countries with Britain giving them the opportunity of selling their products in exchange for her manufactured goods.

W. N. U. 2057

World Wheat Shortage

Extra Needs Shown In New Statistical Survey

London.—Wheat-starved countries of the world will have to depend for extra needs on Canada and Argentina, a new statistical survey reveals.

Weather conditions have cut down the crop in the United States, completely changed the average favorable outlook in the Danube basin, made crop forecasts in Russia extremely uncertain and assured only mediocre production in Australia.

Even Canada's crop has been reduced considerably by heat waves of recent weeks.

Wheat exports have watched a steadily mounting total of reports in recent weeks indicating disastrous inroads made by weather on previous production estimates. Prices are going up, will over last week's figures. It would appear that nearly every wheat-producing country has been more or less affected.

According to British government statistics, the estimated annual total of 483 million bushels shows a reduction of 150 million bushels for domestic consumption, and hence there will be virtually no wheat in the United Kingdom available for export, as reserves must be held for next season as usual.

To Aid Stock Feeders

Credit Corporation May Help Farmers Through Winter

Regina.—Provided reasonable assurance of the safety of investments given, the Dominion Agricultural Credit Corporation has decided on a policy of advances to stock breeders and farmers to assist them in carrying young cattle through the winter. The decision was reached at a meeting of directors here.

An important decision which will in time affect the cattle industry of the three Western provinces, it is expected to result in the placing of between 5,000 and 10,000 cattle on feed farms chiefly in Saskatchewan and Alberta this coming winter. The meeting and discussion that resulted in the decision were urged by W. W. Sharp, Stettler, Alta., president of the corporation.

In all three provinces there are many breeders who have not the feed to carry their stock and who would be therefore compelled to have the full market for what they can get. There are also many farmers having ample feed but no money to buy cattle. This aim of the corporation is to bring these two together.

Famine In Russia

Statement Says Not Less Than Five Million Persons Have Died

Montreal.—On a mission to awaken public opinion to necessity for aiding famine sufferers in Russia, Dr. E. Amende, secretary of the international aid committee, was in Montreal recently.

The committee hoped, he said, to have surplus grain sent to Russia. Clergymen in Western Canada were interested in the project following his trip here, he said.

"Not less than 5,000,000 persons have died from starvation since 1933, the year our committee was formed," he claimed. "The next famine will be far worse than anyone can imagine. It has already assumed so serious an aspect that the Russian government has actually admitted there will be one, after doing its best to conceal the fact since our committee was formed."

"The areas affected are all near the Black Sea ports of Odessa and Rostov," he added, "which would simplify redistribution of grain."

Indian To Become Priest

Alberta Cree Completes Studies And Is Joining Oblate Order

Montreal.—The fourth Indian to become a priest of the Oblate order, Rev. Patrick Mercredi was in Montreal recently on his way to Normandin, Alberta, where he will be ordained by Mgr. Breynat.

Mr. Mercredi, a Cree Indian, was born in Normandin and was educated at Indian schools in the Mackenzie district, at Edmonton and at St. Laurent, Man. He has just returned from France where he completed his theological studies.

HON. HUGH ALLEN

New Minister of Lands and Mines and of Municipal Affairs in the reorganized Alberta Cabinet. Born at Stella, Ontario, Mr. Allen is a graduate in chemistry who took up farming in the Peace River country. He was elected M.L.A. for Peace River in 1926, and in 1930 was returned by acclamation for the new riding of Grande Prairie.

Aspects Of A Desert

Conditions In Southwestern Manitoba Said To Be Bad

Winnipeg.—Southwestern Manitoba is taking on aspects of a desert as the drought-stricken district this year has extended over a greater area than ever before, says a summary of crop conditions issued by the Manitoba department of agriculture.

A strip of land 20 to 40 miles wide along the international boundary shows scarcely a single good field of grain. Soil drifting was followed by clouds of grasshoppers and hot, parching winds have withered whatever crop promised to mature.

"There really is not a single district west of the Red River valley close along the boundary that has anything like a decent crop," the summary says. Wheat, "might" yield five to 10 bushels an acre and oats and barley barely sufficient for seed purposes.

In the northern and eastern sections of Manitoba, conditions show sharp improvement. Conditions are good in the north, though more rain is much needed.

Japan Makes Final Offer

Wants Definite Answer From Moscow On Railway Question

Tokyo.—A spokesman for the foreign office revealed Japan has sent to Moscow a proposal demanding a yes-or-no answer on the potentially dangerous problem of disposal of the Chinese Eastern railway in Manchukuo.

The proposal was in the nature of a final offer to the Soviet government, the spokesman said, on protracted negotiations involving the transfer of the railway to Manchukuo. The line formerly was jointly operated by China and the Soviet.

It was made clear Tokyo considers that upon Moscow's answer depends whether the negotiations, already drawn out for 13 months, will be abruptly terminated, producing a dangerous strain upon Russo-Japanese relations, or their speedy and successful termination assured.

MEMBERS OF SASKATCHEWAN CABINET

Left, R. J. M. Parker, veteran member of the Saskatchewan Legislature, who is Minister of Municipal Affairs in the new Liberal Cabinet and, right, Dr. J. M. Uhrich, Minister of Public Health. Dr. Uhrich, who held the portfolio prior to 1929, is a Rosthern physician.

B.C. Minimum Wage

Board Of Industrial Relations Sets The Scale

Victoria.—Thousands of adult workers in the mercantile industry of British Columbia are affected by a minimum wage order completed by the board of industrial relations.

Under the scale every adult employee in a wholesale or retail establishment must receive a minimum of \$15 a week, providing he works 40 or more hours a week.

For those working less than 40 hours a week the scale is 30 cents an hour with a minimum of \$1.60 a day.

For youths from 16 to 21 years of age the scale is graduated according to the period of employment as follows: First three months, \$9 a week; second three months, \$10; third three months, \$11; fourth three months, \$12. Thereafter until the age of 21 is reached, \$12.75 a week.

German Minister Recalled

Is Censured For His Intervention In Vienna

Berlin.—The German government recalled Herr Reith, German minister to Austria, for his intervention in Vienna without the government's consent.

It was learned from private but reliable authority that Reith conducted the negotiations which led to the end of the Balhausplatz stage.

It was determined that, while still a prisoner, Minister Emil Fey telephoned to Reith, asking him to secure assurances that Nazi plotters would reach the border safely.

After receiving such assurances, it was said he agreed to conduct negotiations in a personal capacity with a view to preventing bloodshed, and went personally to the chancellor.

Pool Payment

Final Cash Payment Received By Alberta Farmers

Calgary.—Cheques representing final cash payment on the 1933-34 voluntary pool have been mailed to all participating members by the Alberta wheat pool. The aggregate amount was not announced.

The final payment on No. 1 Hard was 13.317 cents, making the net total payment 68.317 cents per bushel, while for No. 1 Northern it was 15.063, with the total payment 65.063 cents per bushel.

Pool officials announced the initial payment on deliveries of wheat to the 1934-35 pool had been set, for the time being, at 35 cents per bushel.

May Go To Russia

Possible U.S. Army Bombers Will Make Goodwill Flight

Fairbanks, Alaska.—A possible goodwill flight across the Bering sea to Siberia was in the offing for the 10 United States army bombers.

Basing here for the squadron's three weeks stay in Alaska, Lieut.-Col. Henry Arnold, flight commander, said extensive aerial photographic work and other military surveys will occupy the airman.

Plans for the possible Bering sea flight were delayed pending approval of the war department.

TENSE FEELING IN EUROPE OVER AUSTRIA'S LOSS

London.—Every capital in Europe is tense with expectancy and in some cases apprehension.

Twenty years to a day after Austria's severance of relations with Serbia, which placed Europe on the verge of the Great War, events caused fear to be expressed in Paris over the possible consequences of Austria's loss of independence.

The Italian ambassador to France consulted with the French foreign minister and it was unofficially said that telephone wires between Paris, Rome and London were busy with consultations.

France and the Little Entente view Austrian independence as vital to the peace of Europe.

In Praha, Czechoslovakia, it was said that only Austrian action, with Germany would cause the Little Entente to interfere with Austrian developments, however.

At Berlin, reports that the Nazi putch in Austria had been engineered from Germany met with denial, but there were "I told you so" expressions from the man in the street.

At the Vatican City the utmost regret and sympathy was expressed over the death of Chancellor Dollfus, an ardent Catholic.

Dispatches from Munich said the news from Vienna accounted for recent activities of storm troopers in Bavaria.

In Italy, where the populace was in a high state of excitement over the issuance of orders to the military, former service men's groups were said to be at war time pitch as news of Dollfus' assassination permeated the kingdom.

Their deep resentment against Germany was freely expressed.

Made Clean Sweep

Stock From Prince Of Wales Farm Takes Honors At Saskatoon Fair

Saskatoon.—Stock from H.R.H. Prince of Wales farm at High River, made a clean sweep of the herd classes of Shorthorn cattle at the Saskatoon exhibition. In the individual classes, however, F. H. Deacon, Unionville, Ontario, secured premier honors, taking the grand championships, male and female, with his senior champions. The E.P. ranch excelled in the younger animals, having the reserve grand in the junior champion male and female and heading the female two-year-olds. Duncan Campbell Farms, Moffat, Ontario, took reserve female and T. A. Russell, Downsview, Ontario, the senior reserve male.

Soil Drifting

Co-Operation Of Federal And Provincial Governments Is Sought

Winnipeg.—Co-operation of federal and provincial governments on the problem of soil drifting was sought here by Dr. E. S. Hopkins, of the Dominion experimental farm at Ottawa, now on a survey trip across the prairie provinces.

He planned to confer with agricultural officials of the Western governments, and discussed the situation here with J. H. Evans, deputy minister of agriculture in the Manitoba government.

Will Visit Prairies

Welland, Ont.—En route to Calgary from Riverhead, N.Y., R. H. L'Hommedieu crossed the Peace bridge on his specially constructed English bicycle. The 2,500-mile jaunt will take him through Ontario, Manitoba, Saskatchewan and part of Alberta. The bicycle's special equipment includes a free-wheeling system to make hill-climbing easy.

Plans To Be Announced

London.—What arrangements may be made for celebration of the silver anniversary of the accession of King George and Queen Mary next year, will be outlined in an announcement which it is hoped to make in the hours before it is made for the summer vacation, said Acting Prime Minister Stanley Baldwin.

The Sun's Anniversary.

With this issue The Sun starts on its fifteenth year of continuous publication in this town.

The Proprietor has been more fortunate than the publishers who preceded him in Stony Plain, namely: Frank Gibbon, Ben Ashley, Arthur Bates, J. P. Crowe, W. Wornton and S. H. Kettle, all of whom published papers here at different times.

The Proprietor is indebted to his friends for their continued advertising contributions, job work patronage and also for the subscriptions.

Joe's Busy Sunday.

Mr. Joseph Kulak had quite a busy time on Sunday last, trying to extricate a bogged car in a nearby lake. On being notified, Joe tried to pull 'em out with his sturdy team of Percherons, but succeeded only in busting the four tugs on the team's harness. Joe had better luck after going home and getting his tractor, with which he effected the pullout.

The New Service Station.

Work was commenced Monday on the work of constructing the new service station at Main and Second St. The leveling and excavating for the tank site was done by Mr. Ph. Baron. Mr. John H. Miller, the proprietor, who is well known to motorists in town and district, hopes soon to have the whole works in operation.

"I insisted that OUR FLEET OF 'LIFE SAVERS' CARS BE EQUIPPED WITH FIRESTONE TIRES!"

One of the fleet of Life Saver cars is equipped with Firestone Tires.

FOLLOW the example of fleet owners such as Life Savers Ltd., whose Vice-President, M. B. Bates, learned from actual experience and careful cost records that Firestone Tires give the most dependable and economical mileage.

Put Firestone Tires on your car now and get the benefit of the extra Firestone features that give 25 to 40% longer tire life at no extra cost. See the nearest Firestone Dealer today.

DELIVER YOUR GRAIN TO

UNITED GRAIN GROWERS LTD.

ELEVATOR AT GAINFORD.

Stony Plain and District

Mr. and Mrs. Geo. Oppertshausen and Miss Louise Oppertshausen are at present on motor trip to Portland.

Dr. and Mrs. Oatway are said to be on their way home from Quebec City.

What wheat was left in farmers' granaries is being hauled in now. The price of No. 1 Northern on Monday was the highest this year.

Spruce Grove News.

Mrs. Dan Brox returned on Monday from a trip to Didsbury, where she had been in attendance at a convention.

Mr. Hauer, who met with an accident on the Highway on the 22d, when two buggy drivers collided, has been removed to her home, and is now making an excellent recovery.

The Elephant Brand grain fields are more noticeable than ever at the present time. As one farmer remarked: "These plots don't need a sign on 'em to indicate what they are."

A good piece of work is being done on the road up from Joe Guenette's corner.

The Messrs. Brox have acquired a Chevrolet truck, to be used in their hauling business.

The first grain cutting noticed in the district was done last week on the Johnston farm.

Mr. and Mrs. H. Ducholke have returned home from a vacation spent with friends across the river.

Mr. C. W. Young announces the opening of a general merchandizing store in Spruce Grove, on the self-serve system.

Mr. H. Brox is planning to take a motor party on a trip to the Lacombe district.

During the month of August Spruce Grove congregation will worship with Stony Plain every Sunday morning at 12 o'clock. There will be no service at Spruce Grove during August.

To Shoot the Shoots.

Mr. O. Hoffman expects to leave Edmonton this week with the 6 man squad which is entered in the Ontario Provincial rifle shoot at Long Branch; and which, later, will enter the contests at Rockcliff Range under the auspices of the Dominion Rifle association. Otto was second high man at the recent big shoot at Sarcee.

MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason Dr. Werner's Powder is the world's largest seller and prescribed by leading dentists: it holds teeth so firmly—they fit so comfortably—that all day long you forget you are wearing false plates. Leaves no colored, gummy paste—keeps mouth sanitary, breath pleasant—the best powder you can buy yet cost is small—any drugist.

OCCASIONAL WIFE

By
EDNA ROSE WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, where the rest of the members of the party go to a concert to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep. The next morning, Peter awakes in the early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis "Inspiration." Peter adopts the latter title and Camilla, heartick, goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this and Camilla, stunned, confesses she was hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

Camilla's advertising campaign was a success from the beginning, and it was arranged to have radio broadcasts, in addition to newspaper advertising. Camilla to both write the "Tiny Tots" stories and to deliver them over the radio.

Peter's exhibit was awarded the Paris scholarship and he prepares for his journey to France.

(Now Go On With The Story)

CHAPTER LIV.

That was the shortest two weeks in Camilla's whole life, during which Peter made hasty preparations for going to Paris. He had so many people to see, so many good wishes to honor him personally, various duties to attend to, adjustments to make in his routine life, that she couldn't see him half as much as she wished. Her own work, now so involved and multiplied, added to the difficulty; and it seemed to her as if their hours together were only fleeting moments of greetings and farewells, plans and occasional wistful moments of despair over so long a separation.

"Perhaps," she had a sudden idea one day, "if I continue to see so much money and get my work arranged in advance, I can run over to see you for a little vacation in the spring." Her eyes shone with anticipation in the first joyful moment she had known since the beginning of the whole chaotic affair. "Paris is superb in the springtime, darling. Wouldn't that be wonderful?"

"Sure would!" he agreed, his own

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver!

No Calomel necessary

For you to feel healthy and happy, your liver must pour two ounces of bile into your bowels, every day. Without this bile, trouble starts. Pimples, indigestion, constipation, all these things are caused by a sluggish liver. This completely new liver-cleansing medicine, called "Little Liver Pills," is a stomach, bowels, and liver cleanser. It doesn't make you sick, or nauseated. They don't make you feel worse.

Get your Little Liver Pills. They're the best. Get them by name. Return satisfaction, 30c. at all drug stores.

W. N. U. 2007

spirits rising. "Well, a six month season instead of a year. That helps some."

To which vague reprieve they clung hopefully, trying to convince themselves that six months really was a long time at all when people were so busy and interested in life as they were. No, six months is not a long time in which to be busy; but it is as a century of time, waiting for love.

Peter moved his most valued possession into Camilla's apartment. How she would treasure the sight of them in his absence; what poignant memories of their brief association they would recall.

"Having them here will be heaps of comfort," he told him. "Well, yes, if a few pictures and books and things can take my place, there will be no need of my coming back," he attempted to be gay.

She rebuked him lovingly. "Peter, darling, don't you know that everything you have touched and looked at is precious to me? To be where you have been, to touch what your hands have touched—that is something. I do love you so!"

"I know it, precious. But you're not going to be too sobby, now, and make me worse for me, are you?"

"I won't," she promised with a valiant smile which glistened with unshed tears.

"Sorry I can't even hear your voice every few days over the radio. If I had a fortune, I might arrange for a special short-wave hookup from the Eiffel Tower twice a week."

"If you had a fortune, dear foolish thing, I should be going right along with you," she reminded him.

"And leave your own career behind you?" "doubtfully." "My real career is being Mrs. Anson," she told him firmly. "I'm only playing at being an artist, an author and a radio speaker while I am waiting for the big opportunity of my life—to share yours!"

"You are sweet to say that," he declared, but he did not believe that she meant it. "Anyway, I am glad you make your debut on the air before I leave. Should you rather T come to the studio with you or listen in somewhere?"

"I'd like to think I am just talking to you somewhere, instead of possible thousands. That would make it easier."

"I might listen in with Avis," he observed, casually.

Camilla winced, tried not to mind. "I'd rather," she hesitated, "just think of you listening alone, somewhere."

"Okay," he agreed, without affording it much thought. "And if it will be you you good hereafter, I'll tell you that I'll tune you in in Paris twice every week."

She tried to be amused by his banter, but a tremendous weight hung in her breast that his gay mood could not lift. She assured herself that he was happier only because he was going to his work and ambition, while she already had her right with her, which made it seem less of an adventure to her. To be sure, she anticipated the expansion of her own work with a vast pride and satisfaction; but just now, Peter's departure was paramount in all her thoughts and plans.

During that fortnight, Avis felt somewhat like an ancient faded canvas, over which someone has painted a gay new picture. After her first disappointment over not being able to tell Peter of his victory, she retired almost completely from his activities. But she resolved that her own hands, with powerful chemicals, would destroy that temporary new painting, and she would again be the prominent masterpiece.

She saw Peter only occasionally as he came and went, but did not intrude into his busy days. After her first display of enthusiasm and compliments, she spoke to him only with quiet encouragement and an impersonal interest in his plans.

"It's going to be frightfully lonely here when you are gone," Avis remarked one afternoon when he had stopped in for a chat. "I may give up the place for the winter. On the other hand, I may get to work to real earnestness and accomplish something with which to surprise you when you return. I'll decide about that later, when I see how it goes to miss you. Perhaps in the spring I'll run over to Paris for a while. Should you be glad to see me?"

"Rather. By spring I'll be trailing every American-looking person I see a block ahead of me, to get a look at his face and see if I can claim his acquaintance—or hers."

"So I'd be just another American," she said scornfully. "Well, not at all. I'll rejoice at the sight of any and all Americans, and just go simply cuckoo at the sight of an old friend. Don't be surprised if I kiss you on both cheeks when I greet you, though," he added jovially. "From impulse or habit?"

"Well, when in Rome—" he reminded her lightly.

"Seriously, though, won't you let me give you a grand party, to celebrate your success and give you a proper send off. I'll have a big dinner party at the house—say fifty or so."

"Please, no!" He recalled the night of her last party in his honor, its tragedy, Camilla's chagrin, Avis's accusation. He wanted to spare Camilla any further humiliation, his time was so limited for being alone with her, and he did not particularly enjoy being feted by Avis' wealthy, idling friends whose compliments he doubted were sincere.

He suspected that they regarded his ambition as a huge joke and his victories as a jolly good excuse for a party with plenty of whoopee and an over-indulgence of liquor. He tried to explain gently. "You've been wonderful, Avis, and I appreciate it. You are making all this a happy possibility for me instead of a wretched struggle. When I come back and do something real—you may celebrate as much as you wish. In the meantime, I am sorry I'll have to delay that work for you and your mother. Perhaps it will be the better, when I do it next year. I should have plenty of new inspiration and my technique improved a lot by that time."

"No doubt of it. The work can wait. What's a year?"

"It depends on how you measure it. Anyway, I wish I might pay you that money before I go, but that's impossible, now."

"I shouldn't take it, if you had it. I don't want it. I told you I wanted to invest it, and you may have more any time you need it. Will you promise to let me have it?"

"I'll do that, if you say so. But I'm going to try to make what I have do. I'll get something to work at over there to help with expenses. I can't sculpt and study all the time, and a little work on the side will be a novelty, a recreation and a balance wheel. I'll need all of them."

"Just see that you don't overdo the thing. By the way, I might help you a little there. Do you know anyone in Paris?"

"Not a soul!"

"Then I'll give you a letter to Monsieur Penet, who is a very good friend of mine and will be only too glad to help you find this balance wheel," she finished with a smile.

"You are too kind," his voice was deep and grateful, "and not to let me try your suffer for need of money!"

"Am I? It is so easy to be kind to you, Peter. You are such a marvelous person, yourself."

"There must be something rather good about me to deserve a good friend like you," he returned. "Well, I'll be seeing you again soon. Tomorrow, anyway."

(To Be Continued)

Wanted Everything
Angela shook her head with finality. "No, Tom, I can never be yours. Sorry," she told her young suitor.

He took the blow quite calmly. "All right," he replied. "What about all my presents?"

"I'll return them, of course," she said coldly.

"Yes, I know you will," he exclaimed with some warmth; "but what's going to return all those cigars I gave your beauty and the pennies I gave your fatherly little brother?"

Clydeside Folks Refuse English Sand For Cunard Liner

The new Cunarder now building on the Clyde will not have a mere bathing pool like other big liners, but a real bathing beach. Bathers will walk into the beautiful green water down a stretch of sand, just as they would do at the seaside. Then they can lie on the sands and enjoy artificial sunlight. In every way the environment will be realistic.

Down on the south coast of England, near the mouth of the Thames, is a seaside resort called Margate. It is a place where London "trippers" go by the thousands to spend an odd day, or their annual two weeks with pay. It is strictly the playground of the democracy, but Margate is very proud of itself, and it was just like Margate's impudence to offer to supply the sand for the Cunarder's Lido.

The Clydeside folks immediately waxed indignant. They would have none of that, English sand. It had to be sand from the banks of the Clyde or something.

No doubt the sand will be selected from Rothery, or Ardrossan, or maybe from Sir Harry Lauder's town of Dunoon. This is a Clyde ship that is going to be the pride of the ocean, and the Thames is not going to be allowed to butt in and steal any of the glory. — St. Thomas Times-Journal.

THE RHYMING OPTIMIST

By Aline Michaelis

HEAVEN FOR TWO

Why should heaven be so vast
And so coldly blue?
It was only (in the past)
Large enough for two!

Heaven now is worlds away,
Shining like a star;
But our heaven of yesterday
Was not cold or far.

Then heaven blessed us at high noon,
Folded us at night;
Stayed with us in glow of June
On through winter's blight.

God, grand paradise once more
Lies that heaven we knew,
Shut behind a low, white door,
Large enough for two!

Curious Floating Islands

Masses Of Water Plants Secured By Poplar States

Near the City of Mexico is the Lake of Xochimilco, nearly covered with floating gardens, called chinampas, on which are raised flowers and vegetables for the city markets. They are formed of floating masses of water plants, covered with soil, and secured by poplar stakes. The latter take root, and surround the islands with living hedges. Among the largest natural floating islands are those formed by tangled masses of trees and brushwood carried down by great rivers. On the Mississippi and its tributaries these islands are known as "rafts." One of the most remarkable of these rafts began forming in the Atchafalaya, one of the lower arms of the Mississippi, in 1778, and gradually increased until by 1816 it had extended to ten miles in length, over six hundred yards in width, and eight feet in depth. Although it rose and fell with the water, it was solid enough to support the growth of trees, some of which were sixty feet in height. This vast obstruction was finally removed by the State of Louisiana at great expense.

Although Canada has exported 25 to 30 million bushels of oats to the United Kingdom every year, there is a limited outlet for Canadian oats in the world market. World import requirements amount to about 90 million bushels a year—which is the equivalent of less than one-quarter of average Canadian production. In recent years, Europe has supplied about half of her own requirements, leaving a market for about 45 million bushels to be supplied by non-European exporting countries.

According to experimental tests, a dairy cow on full ration requires in the neighbourhood of 30 pounds of dry matter in each 24 hours.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Little Helps For This Week

"Let the Lord do that which is good" in His sight." 1 Chronicles 10:13.

"Let Thy mercy be upon us O Lord, according as we hope in Thee." Psalm 33:22.

I cannot feel
That all is well when darkening
clouds conceal
The shining sun;
But then, I know
He lives and loves; and say, since it
is so,
Thy will be done.
— S. G. Browning.

No felt evil or defect becomes divine until it is inevitable; and only when resistance to it is exhausted and hope has fled does surrender cease to be premature. The hardness of our task lies here, that we have to strive against the grievous things of life, while hope remains, as if they were evil, and then when the stroke has fallen to accept them from the hand of God and doubt not that they are good. But to the loving trusting heart all things are possible, and even this change from reluctant resistance to struggle surrender is realized without struggle.—Martineau.

A Remarkable Operation

Soviet Surgeon Removes Large Tumor From Girl's Brain

What is described as one of the most remarkable operations in medical history was performed at the Leningrad Surgical Institute.

A tumor the size of a pigeon egg was removed from the brain of a young girl. The malignant growth was threatening her with blindness. The tumor was located only a few millimeters from the optic nerves. The surgeon lifted a portion of the brain to remove the tumor.

It is understood that only a few times in medical history has an operation of this character been undertaken successfully.

Timothy blooms relatively earlier in northern areas than in southern. One possible explanation of this, says the Journal of Agricultural Research, is that the development of the plants in the south during early spring is delayed by the relatively short days that occur in southern latitudes, while on the other hand the development in northern regions is hastened by the relatively long days of the late spring and early summer.

ONOWAY'S SPORTS DAY PROVES A BIG SUCCESS

The committee having charge of Onoway's Sports Day, held last week, got a good break in the weather for running their athletic events. A large crowd assembled early in the day, and had a very enjoyable time, in spite of the excessive heat. The surrounding towns were well represented by their athletes, and Stony Plain also sent up a good sized delegation with its baseball players.

In the baseball tournament Burford defeated Stony; Busby defeated Onoway. In the finals, Burford defeated Busby, and won a \$15 prize.

Several of the Stony athletes were "in the money" in the contests in which they took part.

Deutscher Tag, August 4.

A TWO-DAY celebration by the German-Canadian Reunion Association will open on Saturday next, Aug. 4, with a banquet at the Royal George Hotel, Edmonton, followed by a program of music and entertainment in Edelweiss hall.

On Sunday, the 5th, a parade from Market Square to the South Side Athletic grounds will be staged at 1:30 p.m. In the evening at 8:30 another musical program will be presented in Memorial Hall. During the afternoon and heading the parade the Ellerslie band will play.

Dorothea Wiek, Tonight.

The attraction for this Thursday evening at Kelly's Hall is billed to be Dorothea Wiek, "like no other actress you have ever seen." Dorothea will be seen in "The Cradle Song," in praise of which many columns have been written and printed. This is a Paramount Picture, and patrons here are very fortunate in being able to see it at the price.

Mr Goodman's promise of giving us a good screen show the evening of the 26th was kept, in full measure—both pictures shown being exceptionally good. The inimitable Lee Tracy was in fine form and delighted everyone. The first runoff Freighters of Destiny, proved to be a veritable "genuine Western thriller."

DEATH OF OLDTIMER OF BRIGHTBANK DIST.

The death occurred at 10 a.m. on Thursday last of one of the oldtimers of Brightbank district, Mr August Zahn, at the age of 76 yrs., 10 months, 28 days.

Deceased was born Germany on August 29, 1857. He came to Canada in the year 1904, and lived for two years with his family in Edmonton. At the end of that time he and the family moved to the Stony Plain district; later locating on a homestead on which he has resided up to the time of his death.

The funeral took place on Saturday afternoon. A service was held at Emanuel Lutheran church, Rosenthal, with the pastor, Rev G Poetzsch, officiating. His remains were laid to rest in Rosenthal cemetery.

Deceased is survived by two daughters, Mrs. Ferd. Horn and Mrs. Fred Goebel, both of Stony Plain; 3 sons, William, Edmonton; Adolf, Mervin, Sask.; Edward, at Stony Plain.

John Ambruster in charge of the funeral.

Card of Thanks.

The Family of the late August Zahn wish to thank their friends for the kindnesses shown on the occasion of their recent bereavement.

Brightbank News.

Mr D McDonald is making preparations to move to his homestead in Rocky Rapids district. This is the district in which his nephew, W McKay, settled in last spring. McDonald says the country there looks good to him. He will stay there permanently, upon selling his holdings here.

While repairing a telephone line recently, one of the oldtimers of the district had the misfortune to fall from a pole, but escaped injury.

Miss M Young and Miss G Summerfield are leaving shortly for Jasper Park.

His many friends will be pleased to hear that Mr E Teague is recovering from his recent illness.

Wheat Pool's Final Payment.

Those farmers who sold their wheat thru the Wheat Pool's voluntary pool in the year ending May 31 have received the checks for the 3d and final payment. The initial payment was 35c per bu., basis No. 1 Vancouver; an interim payment of 15c was made; and a final payment of 15.05c, making a total of 65.05c per bu. The Pool's general manager stated that, while the prices realized did not compare favorably with market prices obtaining since May 31, it should be borne in mind that the bulk of the wheat pooled was received last fall when prices were much lower. The voluntary pool for wheat, with the same initial payment for the present, will be continued for the present season. Also, the Wheat Pool will continue to handle wheat and other grains for cash.

UFA Members to Meet.

The UFA members of Parliament, members of Central UFA Executive will convene in Edmonton Thurs. and Fri., Aug. 9 and 10, for their annual conference and get-together. These gatherings have been held each year, at which views are exchanged and the whole UFA political outlook is reviewed.

**Sommerfield & Mayer, Stony Plain, Alta.
Sommerfield-Mayer & Knight, Mayerthorpe.**

Sparkie Says.

A news despatch tells of a New York woman being divorced for the eighth time. That dame is certainly a good loser.

A bankrupt clergyman in England told the Court he had been in the hands of the money-lenders for nine years. He must have found life full of interest.

The Letter Arrived.

People often like to play jokes on postal authorities, but the post office people are not so dumb. Letters addressed to Hollywood and with other inscription except sketches of a large month or large nose were delivered, respectively, to their proper destinations, namely Joe E. Brown and Schnozzle Durante. Something like this happened the other day when the Toronto Post Office stopped to puzzle over a letter addressed to the "Largest automotive company".

"Try General Motors" was the sorter's verdict. He was right, first guess.
